Start here

1. Save an untouched master copy. 2. Choose one business problem. 3. Adapt the relevant template. 4. Pilot it with the people doing the work. 5. Approve, train, and control the released version.

Dashboard use

Enter or paste operating data only in the input areas. The summary formulas and charts update from those entries. Validate definitions and source data before sharing results.

What this toolkit does not do

It does not replace engineering judgment, legal advice, certification, regulatory review, or your documented approval process.
